

### **Short Biography**

May the participation in the condemning demonstrations against the U.S. war on Iraq in Ramadan/2001 in Egypt and the arrest were the reason to approach to work in the field of human rights and unloading myself and a large part of my time to this work. Or maybe the reason is my seeing the reality of the Palestinians and how their basic rights been violated daily, or maybe because we are living in this part of the world which is one of the most dangerous and difficult regions in the world and where there are suffering and torture and prisons .. etc

Whatever the reason which encouraged me and pushed me to work in this field, but I loved it a lot by the days passing by

I Admit that this work is too hard and tired ( physically and psychologically ), especially if the person works in this region exactly, and deal with people like those who live in this region

### **My Name**

Gandy A Sharar, I am living in Jordan, but I'm originally Palestinian, I had Left my study in earlier 2001 because I was arrested in Egypt

### **Since**

Oct15, 2005 it was just a dream or you can called it a hobby to participate in human rights forums and Blogs that discuss the Arabic human rights, this dream or this hobby changed to be a former and Ongoing to me, the work in human rights field especially on the internet or what we can called it as an internet activist. is a hard work full in daily routine, however my work in this field grew up and developed to include more than 24 e-human rights web site addressed to middle east and north Africa

### **Goals**

The Living in Middle East and North Africa in a bitter situation and inside a complex conflict between the ruling and citizens on the one hand and between the Arabic human and himself in the other hand may cause a chronic headaches head and make the person feeling in a strong depression forever

Our area doesn't know what is the meaning of human rights and what are those rights and how to get on those rights and the biggest problem is how to use those rights.. both of Arabic regimes and Arabic people Quite deeply immersed in this situation

The Citizens are afraid to talk about human rights, thinking it's a political affairs and talks and doesn't know what are their rights exactly and how to ask for his rights and how to use his rights if he got on. like what happened in Iraq – Lebanon – Somalia and Sudan

In the other side our Arab governments dose not know the value of their people. did not know the value of rights. Did not know that their own citizens they build the country and the economy

Arab regimes don't permit for their citizens to participate in the political live. Arab countries. did not learn from the experience of World War II

European countries have invested their own citizens . they respected their rights .. What was the result ? the result was the participation from their own citizens in the building and the development ,Plus they were having their rights

On the contrary... What happened with the former Soviet Union , despite the possibilities of what the soviet were had ,they did not respect their own people rights , the result ,failed quickly

**When the Arab countries will invest their citizens ? to build the economy and society**

**The meaning of this preview that the person is who build and destroy the community and the country**

**When will be without any realization of the value of our rights**

The Arabic human prefer the migration outside the mena ( middle east and north Africa ) to look for his rights

**my goals**

our area ( regimes and people ) both of them Should know the value of the rights ,and how to use it, till our countries and our people grow up

We should know the truth ,, that we are are so late and far from the western civilization

We Should focus on the culture of human rights and how to respect the principles and focus on the human rights education and teach the people how to use their rights in correct way until we don't see what have seen in Iraq-Lebanon – Somalia - Sudan and Palestine

For those reasons and causes of this situation, my activities focus on

**The awareness of human rights and the value and importance of the Arab human.**

**The awareness that the respecting of human rights will reduces the migration of Arab youth .**

**The awareness that the dialogues is exacerbating disputes and prevent wars and especially religious dialogue.**

**The awareness that the respecting of human rights will encourages the Arab human in participation in the development.**

**How my work be done ?**

Personally, I like the e-work , and for that reason I founded a specialized e-Web sites ( more than 24 specialized location on the internet ) I focus in my work on the videos – audio and the data to achieve the goal

These specialized sites were able to secure a large base of information and specialized data for the Arab people

## **e-Programs and activities**

most of my activities and programs addressed Arabic language

[home /main - Arabic](#)

[home / main 2nd site - Arabic and English ... where you are right now](#)
